

**GOLD GLASS MOULDINGS**  
**GOLD FOAM CORE BUTYL**  
**GOLD MOULDING RETENTION TAPES**  
**GOLD FOAM SPACING BLOCKS**

**PRODUCT FEATURES**

- Gold Mouldings are easy to work with
- Gold Premium Mouldings and Gold Economy Mouldings available
  - Economy Mouldings
    - Less expensive
    - Glossier/Blacker surface
- Gold Mouldings are designed to lay flush against the vehicle
- Gold Mouldings can be used in over 500 applications for windshields and back glasses.
- Gold Mouldings will reduce inventory and increase cash flow.
- Gold Mouldings are easy to use in cold weather
  - They will not freeze or get stiff
  - Does not need to be warmed up to use
  - Can be left out overnight in the cold in a drop box
- Gold Mouldings do not bunch up in corners
  - Never have to notch the underside to make it look good
- Gold Mouldings do not require heat gun to apply or smooth out rippling
- Gold Mouldings have the widest moulding **T109**.
  - 1¼"-31mm can be applied to tight radius corners without causing distortion or puckering around corners
- Gold Mouldings will not fall off the glass
- Gold Mouldings will not ripple under high heat conditions
- Gold Mouldings will not shrink or discolor over time
- Gold Mouldings will retain shape under all weather conditions
- Gold Mouldings have an underside moulding that works—**T201**
  - For use in body shops for removal and reinstallations
- Channel Butyl will not run or ooze out of moulding in excessive heat
- Channel Butyl is not stringy
- Gold Mouldings are the only mouldings that “BITE” down on the glass
  - Fitting windshield and tempered parts
- Gold Mouldings are packaged on spools for easy dispensing

### Some Uses:

#### Chevy Vans:

DW925/926

DW1161/1162

Replace OEM type Mouldings with T-109
