

## New UNDERSIDE Moulding from Gold Glass Group

With the NEW Group, you can glass easily. Many utilizes an exposed

This moulding often now, this would to buy another glass

With Gold's NEW been eliminated. The Adhesive and bonds also designed a tool (GTOOL201)

UNDERSIDE Moulding from Gold Glass remove and reinstall (R&R) exposed edge new vehicles use an underside moulding that edge design.

gets damaged when removing the glass. Until render the glass useless. Your only choice was with the moulding on it. Not anymore!

UNDERSIDE Moulding your problems have T-201 has a REVOLUTIONARY Pre-applied directly to the underside of the glass. We have that is useful for applying the moulding evenly.

### Application

Before the application of the profile T201 check the glass edges and cut away any remaining adhesive.

1. Put the profile T201 in the application tool.
2. Apply the profile with the application tool to the cleaned or primed glass.
3. While applying the profile keep the application tool against the edge of the glass to ensure an even application.
4. Apply the urethane to the glass so that it is in contact with both the glass and the self adhesive profile.
